Quick Classroom Libraries Checklist

How Do You Build a Classroom Library? Use This Checklist!

Booksource has helped build thousands of classroom libraries. We know how to help you support readers, so they can discover great titles and enjoy reading. When selecting titles for a classroom library, here are some key questions to consider.

- ☐ **Are there enough books, with a good mix of fiction and nonfiction?**
Fountas & Pinnell recommend between 300-600 books per classroom; the International Reading Association suggests starting with at least seven books per child.
- ☐ **Does the classroom library feature a wide range of literary genres?**
Be sure to include short stories, fantasy, realistic fiction, historical fiction and poetry.
- ☐ **Are plenty of different informational genres represented?**
This includes biographies, autobiographies, narrative nonfiction and expository nonfiction.
- ☐ **Have you included books with different structures and in different formats?**
You'll want to feature picture books (yes, even for older students), chapter books and graphic novels, plus books with text features and amazing photographs.
- ☐ **Will all students find stories they can relate to personally, as well as stories that expand their world view?**
Ensure diversity by selecting books with characters of all different ethnicities, social classes, family structures, backgrounds, ages, abilities and disabilities.
- ☐ **Are new and up-to-date titles included?**
A classroom library is always evolving. Add fresh, new reads regularly and keep informational texts current so students get accurate, up-to-date information.
- ☐ **Does the classroom library offer a wide range of reading difficulty?**
Consider Guided Reading and Lexile levels to provide books at the right grade and interest level for your students.
- ☐ **Do the books provide cross-curricular opportunities?**
Books can spark student interest in any subject, so include titles in content areas like social studies, STEM, art and more.

To help you easily find classroom library books, Booksource curates unique collections of engaging, high-interest titles that fit every classroom need imaginable.

Decodable Books: Read & Succeed

HOLDEN, PAM. An essential first introduction to the basic conventions of print, Pre-Reading Level titles help children get off to a flying start. Unlike traditional ABC alphabet books, the letters are presented within a story context so that, using pre-existing letter knowledge and picture clues, children can experience first reading success. Key Letter Readers allow students to use their letter knowledge to read text. Books in this set use bold letter font and additional word spacing, introduce and build phonemic awareness and phonic knowledge, introduce the upper and lower case letters together, use red highlighting to emphasize focus letters and punctuation.

Does Your Classroom Library Include Incidental Diversity?

Incidental diversity is when a story's characters are diverse without highlighting the diversity or making it central to the story. Their diversity is simply one trait of many.

Our experts consider multiple areas of diversity when curating our Diversity & Inclusion collections, including cultures and experiences, gender, race, ethnicity, LGBTQ+, neurodiversity, special needs or abilities, socioeconomic status, refugee and immigrant experiences and non-traditional family structures. **See page 60**

Diverse Books Support SEL

Books are valuable tools for guiding conversations about SEL topics. Children can examine and learn from characters' actions and experiences and relate them to their own. When kids see themselves and others in diverse books, the message is that they matter, others matter, and every person should listen and learn.

Linking diverse books to SEL goals is a powerful way to help students develop awareness, empathy and compassion.

Are Books Part of Your Social Emotional Toolkit?

When students can't manage their emotions or approach learning while feeling safe and cared for, they can't engage in the learning process. SEL books are an amazing resource to integrate into your learning recovery plans because they help facilitate difficult conversations, model coping skills and give students time to relax and de-stress through reading.

Give Students Diverse Choices

Student choice is often influenced by the options available on the classroom bookshelves. It's necessary to make sure that title choice includes books with diversity of race, gender, socioeconomic status, ability, culture and family composition.

These books can provide a sense of belonging for all students when they see themselves in the stories. It can also help develop awareness, empathy and compassion for students who see people unlike themselves at the center of a story.
